# ParkMobile®

# Seamless Validations for Your Parking Operation

With ParkMobile, merchants that operate within your parking location can easily purchase validation codes that offer their customers discounted parking sessions when paying through the app.

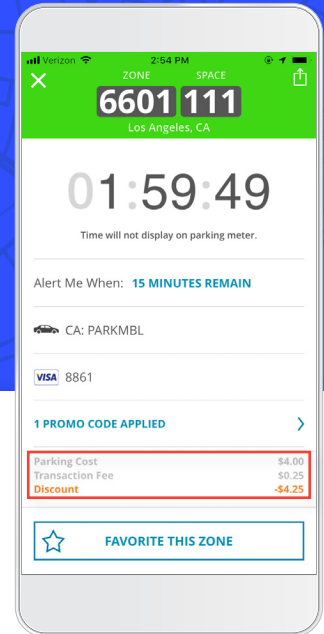

Under the "More" tab, navigate to "Promotion Codes" to enter a validation code.

Once you've entered the code provided by the merchant, you can view validation details.

Before confirmation, the validation discount will automatically apply to your parking session.

Initiate your discounted parking session and manage your time while you're on the go.

Benefits of ParkMobile's Validations Program

Drive more business for merchants with an easy and configurable option for parking validations

Improve the parking experience for customers as they engage with participating establishments

Allow customers to apply parking validations to both current and retroactive parking sessions

Encourage customers to continue using the ParkMobile app to process their parking transactions

To learn more about how to participate in ParkMobile's validation program, please contact am@parkmobile.io.
