

Employment Outcomes of People with Intellectual and Developmental Disabilities

INSTITUTE *on* COMMUNITY INTEGRATION | UNIVERSITY OF MINNESOTA

- There is a big disparity in employment rates for individuals with more extensive support needs, including individuals with intellectual and developmental disabilities (IDD).
- Only 21.5% of individuals with IDD receiving state DD services are employed (Winsor, et al. 2022).
- “Minnesota has 50 available workers for every 100 open jobs.” (U.S. Chamber of Commerce, n.d.).
- Youth employment experiences lead to better employment outcomes following secondary education (Carter et al. 2012; Mazzotti et al., 2016; Siperstein et al., 2014; Test et al., 2009; Wehman et al., 2015).

Benefits to Bridging the Gap

- Initiatives that support the employment of people with IDD can help improve quality of life outcomes as well as help improve current staff shortages.
- Hiring people with IDD brings diversity to the workplace (Lindsay et al., 2018).
 - » People with disabilities are more likely to stay on the job.
 - » Bring unique talents, perspectives, and ideas to the workplace.
- Given the right supports and accommodations, people with disabilities can provide significant contributions to the workplace, just as their non-disabled co-workers.
- Employers with experience hiring people with disabilities have expressed positive attitudes towards their employees, including the commitment and reliability of their employees with disabilities (Fraser et al., 2010; Lindsay et al., 2018).
- Prior experience hiring people with disabilities has been found to be highly correlated with greater willingness to hire other people with disabilities and with improved perceptions of work performance (Dean et al., 2022).

Exploring Transition
in Minnesota

- Previous research has demonstrated improved profits, cost-effectiveness, improved retention and reduced turnover as a result of hiring people with disabilities (Lindsay et al., 2018).
- Hiring people with disabilities can also improve the image and competitiveness of businesses, as well as customer loyalty and satisfaction (Lindsay et al., 2018).
- Employers consider productivity and work ethic as a benefit of hiring people with disabilities (Lindsay et al., 2018).
- We do understand that people do not have experience hiring or working with people with IDD and may not be aware of resources that can help support this effort (Fraser et al., 2010).

Strategies for Hiring People with IDD and Supporting Employment Retainment

- Person-centered planning / assessment of interests and strengths — utilizing those strengths
- Use of a Discovery process (<https://kaposia.com/services/employment/discovery/>)
- Providing appropriate accommodations
- Use of visual reminders (e.g., schedules, who to go to for help, instructions for completing tasks)

The University of Minnesota is an equal opportunity educator and employer. This document is available in alternative formats upon request.

The University of Minnesota stands on *Miní Sóta Makhóche*, the rightful homelands of the *Dakhóta Oyáte*. We recognize the U.S. did not uphold its end of these land treaties. It is the current and continued displacement of the *Dakhóta Oyáte* that allows the University to remain today.

Ongoing oppression and discrimination in the United States has led to significant trauma for many people of color, immigrants, people with disabilities and other oppressed persons. At ICI, we affirm our commitment to address systemic racism, ableism and all other inequalities and forms of oppression to ensure inclusive communities.
